

Name: Ansar Uddin Emon

Roll: 1503049

Project Title: House Renting Management System in Rajshahi.

Project I already have done:

1. Added some features like house pictures, Contact details and Admin panel.
2. Front-end is mostly completed.
3. Some animation is added.
4. Membership panel is added.

Languages I want to use:

1. PHP
2. Bootstrap
3. HTML5
4. CSS
5. Python

Project I want to do:

1. Admin panel is added but its working procedures are not added. Admin panel mainly add the latest update and contact with the people. But the option, links, databases are not added.
2. Front-end is not completed properly. Actually I want design it with other languages like (Bootstrap, CSS)
3. Data bases are not working properly. I want to enrich it.
4. Main details of every houses will be added in pop-up view.
5. Sign-out option is not added yet.
6. Location will be added specifically with every parts of the house.
